About the Conference

The International Conference on Emerging Research, Innovation and Sustainable Development (ICERISD 2026) is a multidisciplinary global platform designed to bring together researchers, academicians, scientists, professionals, industry experts, research scholars, and students from diverse fields of study.

The conference provides an opportunity to present original research, exchange innovative ideas, discuss emerging developments, and build meaningful academic and professional collaborations. ICERISD 2026 encourages interdisciplinary approaches to contemporary challenges by integrating perspectives from science, engineering, technology, management, healthcare, agriculture, education, social sciences, humanities, and sustainability.

The conference aims to promote high-quality research, emerging technologies, responsible innovation, and sustainable solutions that can contribute to academic advancement and societal development. Through presentations, discussions, and scholarly interaction, ICERISD 2026 seeks to create a vibrant platform for knowledge exchange and global research collaboration.

About the Organizer

SciCraftHub International Publication is an academic publishing, research promotion, and scholarly communication organization dedicated to supporting researchers, academicians, students, professionals, and institutions across a wide range of multidisciplinary fields. The organization works with the objective of creating meaningful opportunities for the dissemination of research, exchange of knowledge, academic networking, and professional development at national and international levels. SciCraftHub actively promotes high-quality

scholarly work by encouraging ethical research practices, responsible authorship, transparency, peer review, originality, and academic integrity. It provides a supportive platform for researchers from different disciplines to present their ideas, publish their findings, collaborate with other scholars, and increase the visibility and reach of their academic contributions.

The organization engages in a variety of academic and research-oriented activities, including international and national conferences, peer-reviewed journals, edited books with ISBN, academic books, research publications, workshops, scholarly collaborations, and other knowledge-sharing initiatives. Through these activities, SciCraftHub aims to connect researchers from science, engineering, technology, management, commerce, pharmacy, healthcare, agriculture, education, social sciences, humanities, law, environmental studies, and other emerging interdisciplinary domains. A major focus of SciCraftHub International Publication is to encourage multidisciplinary and interdisciplinary research. The organization recognizes that many contemporary scientific, technological, social, environmental, and economic challenges require collaborative approaches that extend beyond the boundaries of a single discipline. By bringing together scholars from diverse academic backgrounds, SciCraftHub creates opportunities for the exchange of perspectives, development of innovative ideas, and formation of productive research collaborations.

SciCraftHub also places special emphasis on supporting young researchers, research scholars, students, early-career academicians, and independent researchers by providing them with platforms to showcase their work, interact with experienced professionals, strengthen their academic profiles, and gain exposure to the wider research community. Such opportunities are intended to encourage confidence, intellectual curiosity, research excellence, and continued participation in scholarly activities. The organization is committed to building a strong and inclusive global academic network by encouraging collaborations among universities, research institutions, industry professionals, academicians, and subject experts from different regions and countries. Through conferences and publication initiatives, SciCraftHub strives to facilitate professional interaction, knowledge exchange, and cross-border academic partnerships. Another important objective of SciCraftHub is to enhance the visibility, accessibility, and impact of scholarly research. By creating structured platforms for presentation and publication, the organization aims to help valuable research reach a broader academic audience and contribute to ongoing discussions within relevant fields.
